-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by:

MASUDA (US 2003/0016442).

MASUDA '442 discloses a biaxially oriented laminated polyester film comprising at least three polyester layers, wherein the intermediate layer contains a dye substantially dissolved in the polyester resin, wherein the laminated polyester film is further coated with a UV-curable hard coat containing tin oxide or ITO (indium tin oxide) particles. (entire document, see paragraphs 26, 35-36)

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over:

MASUDA (US 2002/0064650),

in view of OKA ET AL (US 5,747,152).

MASUDA '650 discloses a biaxially oriented laminated polyester film comprising at least three polyester layers, wherein the intermediate layer contains a dye substantially dissolved in the polyester resin, wherein the laminated polyester film is further coated with a UV-curable hard coat. (entire document, see paragraphs 15, 19-20, 40) However, the reference does not explicitly disclose the use of the recited metal oxide particles.

OKA ET AL discloses that it is well known in the art to incorporate tin oxide or ITO (indium tin oxide) particles in radiation-curable hard coat layers for polyester films in order to improve durability and to tailor the optical properties of the hard coat to reduce undesirable reflection. (Figure 15-16; line 1-16, col. 26; line 15-50, col. 27; line 15-36, col. 29)

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize known hard coat formulations containing metal oxide-based particles as disclosed in OKA ET AL as the hard coat layer in the films of MASUDA '650 in order to form an abrasion resistant antireflective film for glazing and display applications.
